

No BS Metrics Ratings Platform

VERSION 2.0
TRANSPARENT CROWDSOURCED RATINGS & ASSESSMENTS

BE A CONTRIBUTOR

With the No BS Metrics ratings platform, everyone can be a contributor! Get rewarded for providing quality project ratings and contributing to paid assessments!

CONTRIBUTOR DASHBOARD

We're making the rating and assessment processes more efficient and enjoyable by implementing a contributor dashboard! Submit ratings, complete assessment tasks, view your contributor stats and much more all in one place!

RATINGS & ASSESSMENTS

Users will be able to submit ratings and/or perform paid assessments. Ratings can be submitted for any project at any time, whereas assessments are paid tasks commissioned by projects/exchanges.

RATINGS

Ratings can be submitted by any contributor who holds \$NoBS tokens. They will consist of both subjective and objective criteria in order to accurately gauge a project's performance in several core areas.

RATING QUALITY SCORE

Our scoring algorithms, combined with natural language processing techniques such as sentiment analysis, will calculate a rating quality score for each submission. This will help determine the validity of submitted ratings and will factor in to each user's contributor score.

BIDS

To help combat manipulation, ratings will require a "bid" payable in \$NoBS tokens. The bid amount is determined exclusively by the contributor when submitting the rating.

AIR DROPS & COIN BURNS

Most bid tokens will be airdropped at predetermined payout intervals to contributors, weighted by the user's bid amounts, rating quality / contributor score, etc. The rest will be burnt. Top contributors may earn more tokens than paid-in for consistently submitting great work!

PAID ASSESSMENTS

Assessments are unbiased, transparent, & in-depth project reviews conducted by KYC-verified users. These will be assigned & completed via the contributor dashboard.

CLIENTS & PARTNERS

Assessments will be purchased by project teams or commissioned by exchanges needing trustworthy reviews to evaluate listing requests. We seek to partner with exchanges as their go-to source for unbiased and accurate project evaluations.

GET PAID!

Based on the client's payment amount, assessments will have a fixed "buy-in fee" payable in \$NoBS tokens & a fixed contributor payout to be paid in \$ETH. Our team will review submissions for validity to intercept manipulation and fraud attempts.

CONTRIBUTOR SCORE

Each user will have a contributor score calculated from an aggregate of user statistics like average rating quality, frequency and quantity of submissions, user feedback, and more.

COLLECT REWARDS!

Top contributors will be rewarded for their excellency. These rewards can take many forms, but some examples include No BS Crypto merch, bonus tokens, and more!

REFERRAL PROGRAM

Our referral program helped us execute one of the most viral airdrops in crypto history. We are bringing it back! Refer your friends to the ratings platform and collect referral rewards for each new user that signs up and contributes quality content!

EXPLORE THE DATA

Are you a data nut? Use the No BS Metrics dashboard to dig deep into project ratings data, view completed assessments, analyze contributor statistics, and more! Rating and assessment data will be integrated with our token pick metrics for a more complete and streamlined user experience.

BACK TO OUR ROOTS

With the new No BS Metrics ratings platform, we are embracing our roots: Data-driven metrics, a wonderful community, and **No Bullshit**.
